## Introducing Perla from Nina HOME Wallpapers

A collection of textures and feature designs inspired by natural structures and textile effects, presenting a pallet complete with bold, dramatic colours and subtle tones.

Whether you are looking to create an impact statement or add a delicate textural addition to your décor Perla has it covered.

The embossed surfaces give real structural depth to the collection adding a tactile element that not only enhances each design but gives the collection a long lasting refinement.

Each design has been carefully selected and coloured to create a story with each colour chapter offering something unique yet easy to use in a wide variety of interior styles.
